PROFESSIONAL EXPERIENCE

Mindly Care – Software Engineer Intern (Startup)

May 2025 - Present || Fremont, CA

- Architected secure backend system using Node.js and Firebase Functions, enabling real-time user profile verification for 500+ registered users with 99.8% uptime.
- Delivered responsive landing page redesign resulting in 25% increase in user engagement and 40% improvement in mobile responsiveness across all device types.
- Implemented secure authentication system using AWS Cognito for sign-in/sign-up workflows, achieving 99.5% authentication success rate and enhancing user security with multi-factor authentication.
- Standardized UI component library across 5+ critical user workflows, achieving 40% improvement in platform-wide visual consistency and reducing development time by 30%.

SellMate.AI – Software Engineer – Full Stack Developer (Startup)

Jun 2024 – Aug 2024 || San Francisco, CA

- Built AI-powered product description generator using OpenAI APIs, reducing manual content creation effort by 40% and accelerating product listing time by 30% for 200+ active sellers.
- Engineered robust authentication system with Clerk & Next.js, achieving 98% login success rate & reducing authentication-related support tickets by 50%.
- Developed eBay marketplace integration enabling seamless product uploads, increasing seller efficiency by 35% & reducing manual listing steps by 3x.

LTIMindtree – Software Engineer

Aug 2021 – Jul 2023 || Hyderabad, India

- Automated financial data processing pipeline using Python, transforming Excel datasets into validated CSV files for Bread Financial, reducing manual processing time by 30% and cutting report errors by 25%.
- Designed PostgreSQL database schemas supporting multi-departmental financial reporting for enterprise client, enabling faster data retrieval and cross-team analytics for 50+ stakeholders.
- Deployed scalable backend solutions on AWS EC2 with CI/CD integration, processing 10,000+ records per execution while reducing support escalations by 20% and improving system reliability by 35%.

Northwest Missouri State University – Graduate Assistant

Aug 2024 – Dec 2024 || Maryville, MO

- Mentored 60+ students in Android development and best practices for modular code structure, API design, and Git workflows, improving student project quality by 40%.
- Conducted 100+ code reviews and guided students to follow CI/CD principles, object-oriented programming, and code quality standards, achieving 95% assignment compliance rate.

EDUCATION

Northwest Missouri State University

Master's in Computer Science (GPA: 4.0/4.0)

Maryville, MO, USA

Aug 2023 – Dec 2024

Jawaharlal Nehru Technological University

Bachelor of Technology in Computer Science (GPA: 3.6/4.0)

Hyderabad, India

Jun 2018 – May 2021

SKILLS

Programming Skills: Python, C/C++, Java, HTML, CSS, JavaScript, TypeScript, SQL

Libraries and Frameworks: Angular, React.js, Spring Boot, FastAPI, Flask, OpenCV, Pandas

Cloud & DevOps: AWS EC2, AWS Amplify, AWS Cognito, GCP, CI/CD Pipelines, Docker (Learning)

Data & AI: OpenAI APIs, MLflow, XGBoost, LangChain, Machine Learning, RAG Systems

Databases: PostgreSQL, Firebase, Neo4j

Tools: Tableau, Streamlit, Postman, VS Code

Other Skills: REST, Next.js, Node.js, Git, Confluence, Agile Development

PROJECTS

Customer Churn MLOps Project

- Built end-to-end customer churn prediction pipeline using XGBoost with experiment tracking via MLflow hosted on Docker.
- Deployed trained models via Flask API on AWS EC2, managed versioned inference with MLflow Model Registry.

InterviewBot

[GitHub Link]

- Developed a GenAI-based RAG interview bot in Python with LangChain & GPT-3.5 ingesting over 100 web-scraped documents via token-based text splitting leveraging a Neo4j knowledge graph for retrieval & delivering real-time Q&A through a Streamlit app.

Airline Reservation System

[GitHub Link]

- Built a airline reservation system for domestic flights, featuring dynamic seat selection that reduced booking time by 25%, a secure payment gateway with a 99% success rate, & automated PDF ticket generation with email confirmations cutting manual intervention by 60%.

CERTIFICATIONS

Hewlett Packard Enterprise Software Engineering Job Simulation on Forage (Feb 2025)
