Open to relocation

SUMMARY

Full-Stack Developer with a strong foundation in **DevOps**, **MLOps**, & scalable cloud-native systems. Experienced in designing containerized applications, automating CI/CD workflows, & deploying ML and backend services across **AWS**, **Azure**, & **GCP**. Skilled in building **REST APIs**, integrating ML pipelines with tools like **MLflow** & **Airflow**, & maintaining infrastructure as code with Terraform and Docker. Passionate about delivering robust, reproducible systems that bridge software engineering, machine learning, & cloud operations.

EXPERIENCE

Mindly Care – Full Stack Engineer Intern (Startup) — Fremont, CA **May 2025 - Present**

- Designed & launched new landing pages for Providers, Teachers, & Parents, increasing user engagement by 25% & improving responsiveness.
- Improved UI consistency across 5+ workflows by standardizing profile pictures, button styles, & navigation, resulting in a 40% more cohesive platform experience.
- Participated in testing & debugging of 10+ UI components across user roles, helping reduce front-end bugs by 30% through detailed issue tracking & QA collaboration.

SellMate.AI – Software Engineer – Full Stack Developer (Startup) — San Francisco, CA **Jun 2024 – Aug 2024**

- Designed & integrated an AI-powered item description generator using OpenAI APIs, reducing manual effort by 40% & accelerating product listing time by 30%.
- Implemented secure user authentication with Clerk & Next.js, integrating with eBay OAuth & improving login success rate to 98%, while reducing auth-related errors by 50%.
- Developed & deployed a feature enabling users to add products to eBay via SellMate, increasing seller efficiency by 35% & reducing manual listing steps by 3x.
- Optimized API response times to fetch user-specific eBay listings under 200ms, boosting UI responsiveness by 45%.

Northwest Missouri State University – Graduate Assistant — Maryville, MO **Aug 2024 – Dec 2024**

- Mentored 60+ students in Android development & best practices for modular code structure, API design, & Git workflows.
- Conducted 100+ code reviews & guided students to follow CI/CD principles, object-oriented programming, & code quality standards.
- Maintained GitHub Classroom, automating project management tasks & ensuring 95% compliance with assignment standards.

LTIMindtree – Software Engineer — Hyderabad, India **Aug 2021 – Jul 2023**

- Built & deployed Python-based automation pipelines to process large Excel datasets into validated, well-formatted .csv files for Bread Financial's internal reporting platform reducing manual processing time by 30% & cutting report errors by 25%.
- Designed PostgreSQL database schemas & optimized SQL queries to support accurate storage & fast retrieval of financial data across departments, enabling smoother reporting & cross-team analytics.
- Modularized backend scripts into modular components, integrated them into CI/CD pipelines, & deployed on AWS EC2, improving reliability & scalability of reporting workflows while reducing support escalations by 20% & handling 10K+ records per execution.

PROJECTS

Customer Churn MLOps Project

- Built an end-to-end customer churn prediction pipeline using XGBoost, with experiment tracking via MLflow hosted on Docker.
- Deployed trained models via Flask API on AWS EC2, managed versioned inference with MLflow Model Registry.

InterviewBot

[\[GitHub Link\]](#)

- Developed a GenAI-based RAG interview bot in Python with LangChain & GPT-3.5 ingesting over 100 web-scraped documents via token-based text splitting leveraging a Neo4j knowledge graph for retrieval & delivering real-time Q&A through a Streamlit app.

Airline Reservation System

[\[GitHub Link\]](#)

- Built a airline reservation system for domestic flights, featuring dynamic seat selection that reduced booking time by 25%, a secure payment gateway with a 99% success rate, & automated PDF ticket generation with email confirmations cutting manual intervention by 60%.

EDUCATION

Northwest Missouri State University

Maryville, MO, USA

Master's in Computer Science (GPA: 4.0/4.0)

Aug 2023 – Dec 2024

- Coursework: Web Applications, Android, Databases, Object-Oriented Programming, GenAI, Data Visualization, Tableau

Jawaharlal Nehru Technological University

Hyderabad, India

Bachelor of Technology in Computer Science (GPA: 3.6/4.0)

Jun 2018 – May 2021

SKILLS

Programming & Web Technologies: Java, Python, C, C++, JavaScript, TypeScript, SQL, HTML, CSS, JSON, React.js, Next.js, Node.js

Backend & Cloud Development: Spring Boot, J2EE, Hibernate, REST APIs, Microservices, OAuth, AWS, Azure, GCP

MLOps & DevOps: Docker, Jenkins, Git, GitHub Actions, Kubernetes, Terraform, Apache Airflow, MLflow, CI/CD, Agile

Databases & Data Engineering: Oracle, MySQL, PostgreSQL, MongoDB, Firebase, Redshift

AI, ML & Data Processing: Scikit-learn, XGBoost, Pandas, OpenAI APIs, LangChain, Generative AI, Big Data Analysis

Monitoring & Messaging Systems: Prometheus, Grafana, RabbitMQ(Pub/Sub), Kafka

CERTIFICATIONS

Hewlett Packard Enterprise Software Engineering Job Simulation on Forage (Feb 2025)
